

تعلم الورد دبرس

الجزء الأول

تركيب ورد دبرس باستضافة

مجانية + دومين مجاني

بواسطة الاخ : B27

كلمة الكاتب

يتناول هذا الكتاب كيفية تركيب مدونة وردبرس خطوة خطوة بالشرح المبسط موجهة لجميع الفئات

الأهداف المرجوة

نتمنى في نهاية هذا الكتاب ان يكون القارئ قادرا على تركيب مدونته دون الحاجة لاي احد

كما ارجو ان اكون قد وفقت في كتاب هذا الكتاب
لأنها هذه المرة الاولى التي اكتب فيها كتبيا لذا اعتذر
عن بعض عدم الاحترافية في تقديم الكتاب
كما انه انشاء الله سيتم كتابة جزء اخر يشرح فيه كيفية
تحرير وتغيير مدونة وردبريس + كيفية اضافة
ستايلات الخ

يمكنكم زيارة موقعي لانتظار كل جديد

Confirm Free Domain Registration

You are one click away from registering your free domain name(s). Please click the button below to confirm.

 **FINISH FREE REGISTRATION** 

Registration Success

Thank you for the registration. Your domain(s) have been successfully registered in our database.

Next steps:

- You can manage your domain(s) now over [My Account](#).
- Feel free to [donate](#) to keep this service free of charge.
- Get a FREE hosting account for your CU.CC domains from [here](#). Recommended!
- You can submit (free of charge) your domain(s) to our [directory](#) after you have set them up. This will bring you targeted visitors to your website.

تم التسجيل بنجاح

بعد تسجيل الدومين سنسجل في الاستضافة الان ثم نرجع للدومين بعد حين

ثانياً – التسجيل في استضافة المجانية

يوجد العديد من الاستضافات المجانية و حتى المدفوعة

و سنختار في هذا الشرح استضافة

Free Web Hosting Area

[من هنا](#)

Welcome to **Free Web Hosting Area!!** You can reach us at

[Leave A Message](#)

**FREE SUBDOMAIN
& DOMAIN
HOSTING**

Free subdomain hosting

www. Subdomain (Server Location)
i.e. yourname

Free domain hosting (for already registered domain)

رابط دومين الذي سجلناه

i.e. [www.yourdomain.com](#) [subdomain.yourdomain.de](#) [yourdomain.com.br](#) or [co.uk](#) etc.

[exemple.eu5.org](#) is available on **Eu5.org** server.

This is a free hosting form for ALREADY REGISTERED domains.
If domain was not yet registered to a domain registrar, it will not work. To purchase your own domain, visit [Protonhosting](#).

If you own **exemple.eu5.org** just fill in the form then change nameservers to:

ns1.eu5.org 5.9.106.213 (provide ip only if required)
ns2.eu5.org 5.9.126.141 (provide ip only if required)

With our nameservers you will get **full email support** (IMAP, POP3), powered by Google Apps.
Check the [tutorial](#).

It's forbidden to point **A record** to our ips! We only allow nameservers.

Welcome to FreeWebHostingArea.com!

Dear user, your account **exemple.cu.cc** was successfully activated on **eu5.org server**. Your address is <http://exemple.cu.cc>, update ASAP nameservers (see below), else your site will not work!!

We don't offer free domains, but free hosting for **already registered** domains!!! If you don't own this domain (yearly fee to a domain registrar) it will not work. To register a domain for a good price, please check <http://www.protonhosting.com/>.

Add an index page (examples: index.html or index.php) and put your files directly on root. No public_html folder required.

Be sure that your account has minimum 1hit per month. Inactive accounts are deleted at the end of month.

DNS Information:

Set **Nameservers** to the following records, else your site will not work.

Primary Nameserver: ns1.eu5.org [5.9.106.213]

Secondary Nameserver: ns2.eu5.org [5.9.126.141]

Change to NameServers may take up to 24 hours, depending on location.

هذه صفحة تتضمن بعض معلومات الحساب الاساسية

Attention!! We only allow **nameserver records!** Pointing A record to our IPs is strictly forbidden.

For **full email support** (pop/imap), check [email tutorial](#).

You can register **unlimited subdomains:** subdomain.yourdomain.com. But for each one you must go to **domain registration form** on the same server and register a new account.

Account Manager:

You're hosted on eu5.org server. Account Manager is located at <http://eu5org.freewebhostingarea.com/>.

Username: exemple.cu.cc

Password:

If you have accounts created on more than one server, see <http://www.freewebhostingarea.com/members/>.

Some scripts require **server path**. Yours is **/home/vhosts/exemple.cu.cc**.

Your Personal FTP Information:

FTP Server/Host:	eu5.org
FTP Login/Username:	exemple.cu.cc
FTP PassWord:	98741236

To upload your files go to our **Web based FTP client** (recommended), located at <http://eu5org.freewebhostingarea.com/ftp/>.

Once logged in, you will be able to create a **new dir**, **new file**, to **upload a zip archive** and have it **unzipped** automatically, to **edit** your files, to select files and download them as .zip, to **copy**, **move**, **delete**, **rename**, **chmod** (change permissions), **search** anything under your account, ability to see and edit dot files like **.htaccess**. With a normal ftp program you will not be able to do this.

For a complete list of features see <http://eu5org.freewebhostingarea.com/ftp/help.html>.

MySQL database Information:

You will get a limited number of free databases per account. But you can create other accounts and get as many free databases as you want.

ATTENTION!!! MySQL databases must be activated @ **Account Manager** >> Hit **Create DB** button.

MySQL HostName is **localhost** only. We don't allow external connections.

phpMyAdmin is located at <http://eu5org.freewebhostingarea.com/pma/>. Log in using **MySQL username**.

PhpMyAdmin (PMA) is a tool that will help you to administer your database. You don't have privileges to create a database with PMA because, as said before, databases must be created @ **Account Manager** using **Create DB** button.

Database details (db name, username) will be provided at **Account Manager** once you create the database.

Other features at Account Manager

One click Autoinstaller for **PhpBB3**, **SMF**, **WordPress**, **Joomla**, **Drupal** (with Clean URLs preenabled), **Moodle**.

One click database backup & **One click database import**

Manage DB button (available after you create a database) >> then choose **Backup DB** or **Import DB** buttons

Configure PHP

you can turn on/off **Register Globals**, **Magic Quotes gpc**, **Allow_url_include** variables.

safe_mode is automatically turned **off** few hours after account creation.

Reset Account

useful if you want to delete all files/databases under your account.

Fix Ownership

some files are created with apache permissions (e.g. unpack an archive, php scripts) and you're not able to edit/delete them. This feature will fix permissions and you will be able to manipulate all files under your account.

Account Manager:

You're hosted on eu5.org server. Account Manager is located at <http://eu5org.freewebhostingarea.com/>

Username: exemple.cu.cc

Password: 

If you have accounts created on more than one server, see <http://www.freewebhostingarea.com/members/>.

Some scripts require **server path**. Yours is **/home/vhosts/exemple.cu.cc**.

Server Location: Europe (Germany)

ثالثا – ربط دومين بالاستضافة

شرح

الدومين عبارة عن عنوان عند اتصال به نرى محتويات الموقع المخزنة
بالاستضافة

و لهذا يجب ربط الدومين مع الاستضافة عن طريق دي ان اس

DNS

اذا عندما تودون ان تقوموا بتسجيل في خدمة دومين اخرى غير

CU,CC

تأكدوا انها تقدم خدمة دي ان اس

The screenshot shows the CU.CC website interface. At the top, there is a navigation menu with links: Home, Whois, Donate, Premium Domains, Abuse/Spam, Banners/Links, Affiliates, Knowledgebase **new**, and My Account. Below the menu is the CU.CC logo with the tagline 'A FREE NAME FOR U'. To the right of the logo is a promotional banner: 'Get a FREE domain with FREE DNS service! Register up to 100 domains for FREE. No Donations. No Surveys.' Below the banner is a domain registration form with the text 'WWW.' followed by an input field and '.CU.CC'. Below the input field is an orange button labeled 'Check Availability'. A blue arrow points from the 'My Account' button in the navigation menu to the registration form area.

Title

WordPress is web software you can use to create a beautiful website or blog. We like to say that WordPress is both free and priceless at the same time.
The core software is built by hundreds of community volunteers, and when you're ready for more there are thousands of [plugins](#) and [themes](#) available to transform your site into almost [anything you can imagine](#). Over 60 million people have chosen WordPress to power the place on the web they call "home" — we'd love you to join the family.
Ready to get started? [Download WordPress 3.6.1](#)

Release Notification

We've got a handy mailing list that we send a friendly message to whenever there's a new stable release for you to enjoy.

* تحميل برنامج

FilleZilla

من هنا

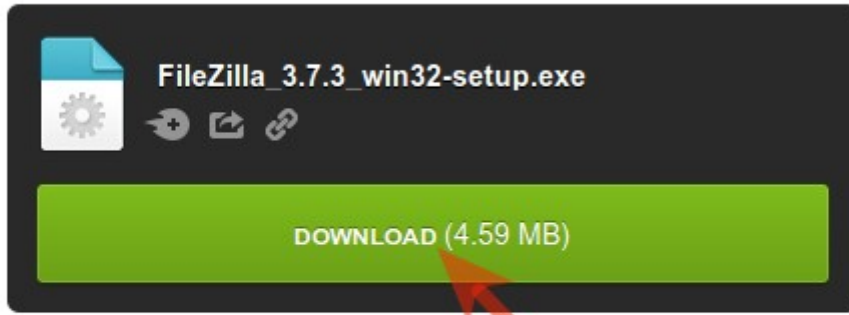

هو برنامج رائع يسمح بارسال والتحكم بالملفات عن طريق

افتبي

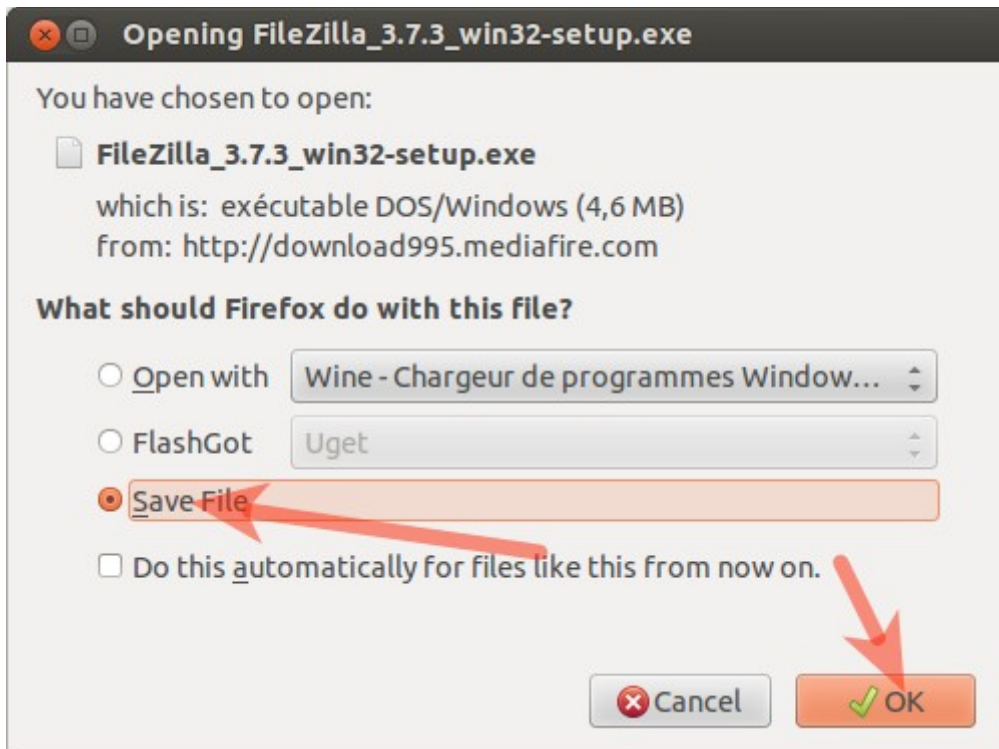

FileZilla propose un client FTP libre et simple d'utilisation qui permettra aux débutants comme aux utilisateurs confirmés de se connecter à distance sur un serveur afin d'y télécharger des fichiers. Cette application particulièrement riche en fonctionnalités supporte le glisser-déposer, les protocoles SSL et SSH et permet de reprendre les mises à jour et téléchargements interrompus y compris pour les fichiers de taille conséquente (supérieurs à 4 Go). Grâce au gestionnaire de sites intégré, vous pouvez accéder plus rapidement aux adresses auxquelles vous vous connectez de façon régulière. Dans la nouvelle mouture de *FileZilla* on retrouve de nouvelles fonctionnalités, notamment l'affichage de la quantité de données transférées et le temps de transfert dans la fenêtre de log. *FileZilla* dispose également d'un accès plus rapide à la fonction de limitation de vitesse des transferts et ajoute le support du bouton retour arrière sur les souris qui en disposent. Enfin *FileZilla* propose un rafraîchissement de l'interface avec des icônes mises au goût du jour.

Download

اضغط للتحميل

ثم قم بتثبيت البرنامج بعد تحميله

* رفع سكريبت وردبرس على الاستضافة •

هنالك طريقتان لرفع الوردبرس

الاولى

عن طريق file manager الخاص بالاستضافة او اخرى في مواقع اخرى
و يمكن تسمية هذا النوع بـ

Online FTP

 **Member Area**

For latest **news**, follow us on **TWITTER**.

 Update your email address. Account Data	 Change account (ftp) password. Change Passwd
 Upload, edit or backup your files. Zip support. File Manager	 Create your website with just one click. Site Builder
 1 Click Autoinstaller for phpBB3, Joomla, etc. Create DB	 Create your MySQL Databases. Create DB
 Configure PHP variables. Configure PHP	 Advanced traffic counter. Free Counter
 Delete all databases and files under account. Reset Account	 If you need help just contact us. Contact Us
 Fix ownership for all your files. Fix Ownership	 Remove ads and enable premium features. Upgrade

الطريقة الثانية

و التي تهمننا وهي عن طريق برنامج

FileZilla

في البداية ساشرح البرنامج

The screenshot shows the FileZilla interface with several red arrows pointing to specific fields and components, accompanied by Arabic text explaining them:

- Hôte:** سيرفر افنتي (Server IP)
- Identifiant:** اسم مستخدم (Username)
- Mot de passe:** الرقم السري (Password)
- Port:** بورت اتركه فارغ (Port, leave empty)
- Connexion rapide:** هذا الاختلاف بسيط بين نسختي ونسختكم ولكن هذا ليس بمشكلة (This difference is simple between my version and yours, but this is not a problem)
- Site local:** /home/okba/Bureau/ (Local site path)
- Site distant:** (Remote site path)
- المجلدات التي في حاسوبي:** (Folders on my computer)
- هنا ستظهر المجلدات التي في موقعي:** (Folders will appear here on my site)
- ملفات المجلد الذي تم تحديده:** (Files of the selected folder)
- هنا ملفات موقعي:** (Files on my site)
- فشل في حالة انتظار:** (Failed in case of waiting)
- فشل:** (Failed)
- نجحت العملية:** (Operation successful)
- هنا تظهر الملفات التي ارسلتها + حالتها:** (Here you see the files you sent + their status)

The interface also shows a file list on the left and a status bar at the bottom with tabs for 'Fichiers en file d'attente', 'Transferts échoués', and 'Transferts réussis'.

There doesn't seem to be a wp-config.php file. I need this before we can get started.

Need more help? [We got it.](#)

You can create a wp-config.php file through a web interface, but this doesn't work for all server setups. The safest way is to manually create the file.

Create a Configuration File

Welcome to WordPress. Before getting started, we need some information on the database. You will need to know the following items before proceeding.

1. Database name
2. Database username
3. Database password
4. Database host
5. Table prefix (if you want to run more than one WordPress in a single database)

If for any reason this automatic file creation doesn't work, don't worry. All this does is fill in the database information to a configuration file. You may also simply open wp-config-sample.php in a text editor, fill in your information, and save it as wp-config.php.

In all likelihood, these items were supplied to you by your Web Host. If you do not have this information, then you will need to contact them before you can continue. If you're all ready...

Let's go!

Below you should enter your database connection details. If you don't know your host.

Database Name The name of the database you want to run WordPress on.

User Name Your MySQL username.

Password ...and your MySQL password.

Database Host You should have your web server work on localhost.

Table Prefix If you've installed multiple WordPresses, you may want to change the table prefix.

Submit

قد تختلف من استضافة لآخرى

Sorry, but I can't write the wp-config.php file.

You can create the wp-config.php manually and paste the following text into it.

```
<?php
/**
 * The base configurations of the WordPress.
 *
 * This file has the following configurations: MySQL settings, Table Prefix,
 * Secret Keys, WordPress Language, and ABSPATH. You can find more information
 * by visiting {@link http://codex.wordpress.org/Editing_wp-config.php Editing
 * wp-config.php} Codex page. You can get the MySQL settings from your web host.
 *
 * This file is used by the wp-config.php creation script during the
 * installation. You don't have to use the web site, you can just copy this file
 * to "wp-config.php" and fill in the values.
 *
 * @package WordPress
 */
```

انسخ كل شيء
CTRL + A

After you've done that, click "Run the install."

Run the install

define('WP_DEBUG', false);

/* That's all, stop editing! Happy blogging. */

/** Absolute path to the WordPress directory. */
```

You can create the wp-config.php manually and paste the following text into it.

```
<?php
/**
 * The base configurations of the WordPress.
 *
 * This file has the following configurations: MySQL settings, Table Prefix,
 * Secret Keys, WordPress Language, and ABSPATH. You can find more information
 * by visiting http://codex.wordpress.org/Editing\_wp-config.php
 * Codex page. You can get the MySQL settings from your web host's MySQL
 * administrator.
 *
 * This file is used by the wp-config.php creation script during the
 * installation. You don't have to use the web site, you can just copy this
 * file to "wp-config.php" and fill in the values.
 *
 * @package WordPress
 */
```

After you've done that, click "Run the install."

Run the install

Please provide the following information. Don't worry, you can always change these settings later.

Site Title

اسم الموقع

Username

اسم مدير الموقع

Username can have only alphanumeric characters, spaces, underscores, hyphens, periods and the @ symbol.

Password, twice

A password will be automatically generated for you if you leave this blank.

Strength indicator

Hint: The password should be at least seven characters long. To make it stronger, use upper and lower case letters, numbers and symbols like ! " ? \$ % ^ &).
