2 **Android**

After shadow customers

PRESENTED TO:

My dear friend Eng. Ramy Wadee

AN INTRODUCTION:

The meeting is renewed with Sebastian (Android) and Zapatero (Marshmallow) after they graduated from the Engineering College, and they got married to (Duro) and (Helen) and created their own software company (A-One), but this time they are on a date with the black scarf company in the job market, which practices counterfeiting In many ways, and their mission this time is to expose fraud by this company through their developed software, and their third companion (Michelle), who graduated with them in the same year, helps them in the face of the black scarf company, which is very similar to the shadow customer group but in practical life and daily living reality.

The Author:

Andrew Akoula Girges

About the Author:

- Name: Andrew Akoula Girges
- Graduated from the Faculty of Medicine
 - He is currently studying ENT
 - Very fond of science and technology
- He likes to read poetry and practice football
- Mathematics and physics of favorite materials
- He loves hiking amidst greenery and landscapes

1 Limited Software Company (A-One)

(Android) married his girlfriend (Duru) or (Fuchsia), as well as (Marcello) from his girlfriend (Helen) or (Rose) in a big ceremony attended by their friends from the College of Engineering and the rest of the family and relatives and after a period of time each of them worked in a private company, (Android) suggested to (Marcello) the creation of a small software company for them. (Sebastian) told his friend (Zapatero): We need a qualitative shift in our professional lives and we have sufficient experience in computers as well as software, so why not use that to create our own company instead on the work of each of us in a company away from the other, and to join a number of our old friends to retrieve the days of study and the beautiful memories, (Zapatero) replied:

It is really a great idea but it needs a large capital, so (Sebastian) Android responded: We do not necessarily have to start our work big so we can start in a small partnership to grow and grow with days and success will increase our determination and move us forward, but we need a small work team first to start the basic business of the company and be devoted to it and then we add the necessary elements according to the needs of the work, who do you remember from our old friends fit for this task? (Zapatero) Marshmallow replied: I think (Michelle) is fit for this task, as I recently

learned from him that he is not satisfied with the amount he takes in the company he works for, they also deprived him of the last promotion, so (Sebastian) said: Is he ready for an adventure in a new company that might fail or be successful? (Marshmallow) answered: He will definitely love working with us and he does not care much about the principle of loss so much. Let's show it to him and I am sure he will like the idea a lot. Indeed, (Android) and (Marshmallow) called (Michelle) to present to him the matter of the new partnership. Indeed, (Michelle) welcomed the idea very much and they decided to register the company and name it: (A-One) Software Co., Ltd. and started its work in web design first. (Android) liked to work in the morning period, and (Michelle) prefers to work in the evening period, while (Marshmallow) was distributing his time between the two periods, and the company's activity expanded in making a professional design for electronic and printed books. (Sebastian) lends the aesthetic touch to the covers and posters of the designed books and (Marshmallow) edit the content from the inside so that (Michelle) will review all this in the end, and (Android) used the aesthetic touch and good taste for him in making advertising publications that are very wonderful and beautiful as well as personal cards for different professions, they also designed an application on the Android system that allows the conversion of PDF files to three-dimensional books as well as compilation of single author books in one application and this application was free and another paid provides you with ready-made templates and professional-quality images for the manufacture of your own magazine, where all you had to do

was enter the appropriate content on the appropriate template and use your own images or images that are already in the program to produce a special professional magazine in a few minutes and they made another program that allows to correct spelling errors as well as grammar errors in the written text and provided the application for free in three copies; One for desktop and one for Android and one for iOS and they also created entertainment applications that provide you with one of the tickets for General Football League matches by anticipating the results of 3 correct matches, and the name (A-One) began to shine in the city through the beautiful posters that the company name is placed on the bottom of them that designed by (Sebastian) Android and the good content provided by (Michelle), as well as the name of the company found in the free and paid programs that they provide and they promoted entertainment programs that (Marshmallow) prepares them as a large audience of football fans got free tickets by expecting the results of the correct matches and people in (Mendivia) province knew that the trio (Sebastian - Zapatero - Michelle) who helped eliminate the shadow agents had reappeared again through a distinguished software company called (A-One), the name of the trio began to infiltrate, as well as their company, outside the boundaries of (Mendivia) district, to include new parts in the aspects of the state (Ironca).

2 Android 11 (Royal Jelly)

After the success of (A-One) company and the multiplicity of activities and services that it provides, the three friends thought about developing a version of their Android system, and indeed they worked day and night to make the necessary adjustments until a fixed version of the system came to light after trying it many times and called it Android 11 or (Royal jelly), and they issued 4 versions of it: one directed to mobile devices and its name (Mobi Royal Jelly) and another for tablets and its name (Tab Royal Jelly) and another for desktop devices and its name (Royal Jelly for desktop devices) and the last for developers and its name (Royal Jelly Server) and all the upgraded versions were free and open Source except for the version of developers that requires paying for the cost of downloading on the server, the version (Mobi Royal Jelly) for mobile devices supported the fifth generation networks, as well as foldable phones and the screen divided into two halves, as well as the notch found in modern devices, and this version facilitated the speed of publishing and linking applications that they produce with users and easy access to notifications or alerts when there are new applications or versions and there were applications on the two versions of the tab, and desktop devices allow connecting all single family devices to each other and parents monitor the content

of their children's devices likewise, the times they spend on them, as well as enabling the guardian to remotely close the device of his son or daughter and that encouraged students to download textbooks and educational applications from the Internet because the father or mother can now browse the son or daughter device like he browses his device exactly, and there were applications that nominate students, as well as their parents, YouTube videos with scientific as well as educational content. The server version was more professional and allowed developers to exchange their experiences as well as sell their applications either to A-One or to a third party and was supporting light games production programs and also the three friends benefited from the ideas of some of the young people and they gave the appropriate distinctive product the corresponding money exchange and a number of amateurs and professionals joined a work team A-One. Others preferred to work from home remotely and the company's design team had the special program pre-loaded on the system, which allows editing the product by more than one of the working team remotely and inform each developer of the stage in which he arrived at his design to the other and then on one of the three friends for approval before it is implemented, it also included an attractive and fast internet browser and programs similar to the Microsoft Office desktop package, as well as an editor for PDF files, as well as editing programs that allow the introduction of various MP3 files on video clips and the triple (Sebastian - Zapatero - Michelle) put their own voice in the program to comment on different videos, and the voice of (Zapatero's) comment on the various clips was what made the

entire team laugh, as did the audience, as his comic comments on the funny videos got a high view rate on the company's private page on Facebook or YouTube. Some of the company's designs were displayed on Instagram, which included a number of promotional products for some major companies, writers or famous artists, and the Android 11 version (or Royal Jelly) won a lot with its various versions and their company gained a wide audience in the state of (Ironca) and the developers' copy earned them a little profit, and the bees and royal honey posters were the fashion of that year, as many comics spread among the public, such as: Comics, get away from me, you naughty bee, I will not lie again among the children or watch out, you student, who failed, because the bees are waiting for you on the way and others likewise: royal honey enhances sexual ability and gives you pleasure with a life partner and protects you from diseases between middle-aged and other young people and some false medical information appeared that says that royal honey protects against the Corona virus and that the queen pinch generates antibodies inside the human body but the doctors lied such rumors that they noted that there is no role for royal honey in eliminating viruses and that the queen pinch of bees may cause redness and severe sensitivity in the affected area of the skin as a result of the body's formation of antibodies and histamine compounds and that you must take an anti-allergic drug whether by injection or by mouth when you are exposed to such stings, but they emphasized that royal honey and other types of regular honey do not degrade or rot and bacteria cannot grow or multiply in the middle and that it does

not need preservatives in order to store it. (A-One) has published this valuable medical information on their Facebook page, and has also sent private messages to users of Android 11 applications or any of the company's applications.

3 Electric Dynamo Car

(Sebastian) Android knew a little about automotive engineering and related mechanics, but he was fond of electrical and its applications by virtue of working in the field of computers and was very interested in the technology of electric cars and the development of the accident in self-driving vehicles and he was thinking about the dilemma of charging batteries for electric cars and the need to have enough stations for charging inside or outside the city and the short distance that cars travel by using a single battery, which must be replaced or changed after exhausting the capacity of the single charge of the battery. He thinks about the need for a permanent or continuous source of energy to supply the car with the necessary electrical energy during one trip and assume that in the case of 4 dynamo distributed to the four wheels of the car so that they benefit from the continuous movement of the wheels in generating energy and storing them in 4 additional electric batteries provide the car with the necessary energy in the event that the amount of petrol that already exists and that supplied the engine with the necessary energy before its completion during the middle of the trip before it ends and called this model: the dynamo model of the hybrid car then consider another model: a very large capacity battery replaces the gasoline-powered engine and this battery

provides the vehicle with the necessary electrical energy during the trip and takes advantage of the constant movement of the wheels to charge the other four small batteries so that it replaces the big battery when its charge is used to start the car engine and vice versa, this time it benefits from the movement of the four wheels, each of which contains a dynamo that is already special in charging the large capacity battery and the system continues to switch the power source between: the large capacity battery and the other four small capacity batteries until the energy of one of them completely ends and is replaced then the car has traveled a very long distance during one trip and this model is called: the dynamo model of the pure car and he tried to register the two models as his own patent owned by (A-One), and the patent office actually agreed to register the two models, the first and the second one for (Sebastian) Android, not only did rather, he wanted to enter his patent in the manufacturing stages, and they had another friend called (Marcos) working for the (Bentley Continental Company) for luxury cars, and (Sebastian) Android consulted him on the possibility of designing and manufacturing this model on a commercial scale and (Marcos) promised that he would discuss with his friends from the company's engineers the possibility of producing this model on a commercial scale and realize the dream of (Sebastian) Android, and they tried and tested two (Sebastian's) models in (Marcos's) company several times, where they were able to integrate the first model in the large sedan and the second model in small electric cars. They tried to obtain an agreement with (Sebastian) to produce the two models, and (Sebastian)

signed a contract with the (Bentley Continental Company) that allows them to manufacture and produce the models on a commercial scale, but it does not allow the company to monopolize these two models and gives (Sebastian) the right to sell them to other parties, indeed, (Bentley) made the first model in its new sedan called (Dynamic Four) and took advantage of the second model in the production of its small electric car, called (Dynamo Sales) and (Sebastian) received as well (Zapatero) and (Michelle) a special version of the electric car of the company and its name (Bentley – M.A.M.), it was produced in small numbers for the distinguished customers of the company, and (Sebastian) got another sedan, which is also a special version called (Bentley - A-One), the same version that their friend (Marcos) also got, as a result of two models of (Sebastian) invention, (Bentley Continental) signed several partnership agreements between it and (A-One) to support their cooperation in various fields. The (Bentley – M.A.M.), which the three friends obtained, was the (Mendivia) county icon and a special footprint for their company in the city for clean energy and environmental preservation, while the other version (Bentley - A1) was considered a distinct concept of spaciousness and luxury.

4 Black Scarf for advertising

During the company (A1) is doing all of these successes, as well as wide fame they have achieved in the original boycott (Mendivia) as well as across the country mother, it began to appear on the scene another company called the black scarf, the original activity of it was in the field of advertising propaganda, but what is this story of this company?

The founder of this company is Mr. (Harrison), James's cousin, a showman from the Shadow Agents group, and he does not differ much from his cousin in love with the madness of fame and exhibition. This company started by forming an association from the Faculty of Commerce representation team, among whom was the elegant (Lucy), with a distant kinship of crazy (Maureen) from the Shadow Customers team, Their first activity was through the funeral of their third friend (Janet's) uncle the liar one, her uncle was rude and unpopular in the city and she was feared that he would not have a decent funeral because of the people's hatred for him and told the matter to (Harrison) and (Lucy), who acted quickly and enlisted the help of some women from the cast to attend the funeral of (Janet's) uncle the liar and the representation of sadness, crying and wailing so that (Janet) does not appear in an embarrassing appearance in front of the public and whenever the (Janet) the liar raised her black hat in her uncle's

burial ceremonies, women increased in shouting and wailing.

The elegant (Lucy) agreed with them on the amount of 20 dollars each of them that (Janet) raised her hat and indeed (Janet) succeeded in going out to her funeral uncle in a decent appearance and the elegant (Lucy) paid generously to them.

The idea impressed their friend (Harrison), who decided to use the same representation team of women for everyone who wants to pay as well as the false (Janet), and (Harrison) shared the amount he gets between him and (Lucy) and (Janet) on the

one hand and the women's team on the other hand The idea worked and won the approval of many, the city is crowded with the last ones with liars like (Janet) and dude like (Lucy), who only care about their general view in front of people and

let honesty go along with anything else to hell and just as funerals needed liars, the weddings were also. There have been a lot of hurt lovers who want revenge on the other side, starting with (Melania), also (Lucy's) good friend who wanted to take revenge on her boyfriend, (Daniel), because he left her and the owner of another girl, before his wedding took place

on her, the elegant (Lucy) sent the stage theater girl (Jacqueline) to (Daniel's) lover to claim that she is his girlfriend at the present time and that she is pregnant with him

in the third month, (Daniel's) new lover revolt strongly and decide to break away him and send him all his gifts four days before completing the wedding. (Harrison) decided to take

advantage of this idea also for those who pay generously and used the pictures of the beautiful model (Jacqueline) and installed it using (Photoshop) on the pictures of many young victims like (Daniel) and send pictures of the victims to their

beloved in the application of conversations of Facebook. Not only that, they used montage software to incorporate fake videos of the male or female victim for the benefit of those pushing for revenge on the other side, and the matter developed a lot with them and they became experts in fabricating photos, videos and pornography and they became famous among the failed community and outlaws, and they were joined by a few hackers who were able to amend the photo or video in a few minutes. It seems that we are on a date with a group of shadow agents again, but in a new name it is the black scarf company for advertising which includes (Harrison) James's cousin, the dressy (Lucy), the false (Janet) and the beautiful (Jacqueline) show theater girl and dozens of computer professionals and hackers programs like (Keno) the kidnapped programmer whose role will be clarified later as he was able to modify the image in Less than 59 seconds and the video in less than a few minutes, he was the head of the montage and video editing department for the company and there were under him a number of hackers with great experience in the field of voyeurism and penetration as well.

5 Quasi-actors and officials

The Black Scarf Company professionalized the fraud and fabrication work after that. (Harrison) was able to recruit a group of semi-actors and officials to make false advertising campaigns for the company, for example, he hired a similar artist (Martin Nicholas), the first screen boy in the state of (Ironca), and the girls' lover there to promote a chain of clothing and sports shoes stores, and a similar artist appeared in the ad dancing and swaying on his bike while he was marketing this clothing brand, and (Harrison) knows that his fans of young men and girls will definitely pant after the products of this company, likewise, the young singer (Edward Hall) to promote a group of preserved foods for a large audience to accept, their role did not stop at this, but they came similar to the county mayor to make some baseless press and TV statements. There was a piece of land a construction company was trying to seize from the government, and they made a similar mayor testify that they had issued a license to this company and they owned the disputed land after this company paid a large sum for the Black Scarf Company, likewise, one of the mobile phone companies, the one similar to the mayor stated that the district had already contracted with it, and there was a factory inside the district that residents wanted to move outside the city limits because of the

exchange problems of the factory's waste, the mayor similar declared that the factory had reconciled with the district presidency council after paying the required fine and repairing drainage problems despite the presence of large parts soaked in wastewater and the resulting waste in his vicinity and there was a chain of restaurants that had been seized due to the presence of a spoiled food shipment that is not fit for human consumption, the mayor-like appeared to discredit all this for the reputation of this restaurant chain. The quasi-actors and officials were so carefully chosen that you could not separate them from the real person and complaints of the people affected against the black scarf company have already arrived, but no one has ever been able to prove anything against them. (Harrison) was bringing in such likes and working with them in complete darkness and then leaking them like dark bats or flying black steam. The fraud spanned more than this. He managed to bring in similar famous clerics and preachers in the town to promote and publicize a specific hospital or an orphanage. After that, more fake and deceitful acts of citizens began, they came to resemble the well-known actress (Margaret) to promote a specific sexual enhancement product in clothes that are totally immodest on screen, this actress was an obsession for every unmarried man, and the curse of every married man on his wife for the severity of her beauty and prominent charms which not only a few men admired and this actress complained about them, but after her similar had flown and disappeared from the city with lightning speed, they also rented a number of parade girls with semi-naked bodies to promote harmful medical preparations and unlicensed

products such as those that say it treats osteoarthritis and those that rid the liver, kidneys and body of toxins and that treat swelling of the colon, which prevent graying of hair or repair baldness and return hair that has blemished its original color. It was the most strange of these products that says that they work to enlarge the size of the breasts or the buttocks or work to elongate the penis, these naked girls have caused an imbalance among the masses of viewers, especially those who have not been educated or do not have medical awareness or complete education. The likes of these actors and officials caused a state of playfulness in the boycott, so no one knew the correct statement or the truth until the actor (Martin Nicholas) once said: I have started counting my likes as well as my own suits. The mayor of the county said: I no longer know myself and what decisions I issued or prevented them from other decisions because of the similarity between me and my similar, which appears in the advertisements of the black scarf. As for (Edward Hall) the young singer, he started recording his private ownership, he also insured him in one of the insurance companies so that he would not exploit the likeness of such scams in order to make ads or record songs with his voice.

6 Destruction and martyrdom acts

There were some politicians who wanted to cover up some of the social problems in the country: such as the housing crisis, labor wages, the delay in the marriage age, the problem of high prices and the lack of new job opportunities for young people, they wanted to distract a large segment of the people in a series of successive events so that the group would not demand further reforms and thus ensure that they are on the same chairs in the current government, So Mr. (Marcelo), the Minister of the Interior, and with him (Mr. Gonti), the Minister of Manpower, resorted to an infernal ruse, which is photographing some fabricated events through the Black Scarf Company in order to show the strength of the security apparatus's arm and distract the youth from making new demonstrations that demand reform or the creation of new job opportunities from the government. Indeed, Mr. (Marcelo) and Mr. (Gonti) have agreed with Mr. Harrison on the elaborate plan to be photographed. The events started by photographing a jihadist masked man, as he was blowing up a church that is not really there, and then a group of bandits looted trucks and seized what was on the highway. The black scarf company filmed the two incidents and the kidnapped programmer (Keno) modified them through montage and video editing programs and broadcast them via YouTube

platform to engage the country after that with the issue of the church bombing and the presence of terrorists on its lands that are not already present, likewise, the journeys started to decrease on the intended highway where the incident of the looting of transit trucks occurred, and they then photographed men in the uniform of security men as they prevented another terrorist from storming another church and blowing himself up, likewise, the success of these men in preventing a big mall from being blown up, and a squad of bomb squads aborting the time bomb in it, as well as their success in defusing the bombing of a vital bridge in the city after it was trapped. Their videos did not stop at that, but they portrayed the men in uniform as security men, who were arresting this highway gang and seizing a large quantity of weapons and drugs before selling them on the black market. The plan was completely peculiar because the people who revolted against the minister shortly after the alleged bombing of a church had started clapping and cheering for him again after how many of these fabricated videos were about the role of the powerful police force. A journalist specializing in writing about obscure scandals and incidents was loyal to the Black Scarf Company. Mr. (Harrison) commissioned him to praise the competent minister's role in facing such urgent terrorist incidents. Journalist (Pinto Gonzalez) wrote in his newspaper with broad headlines: Terrorism is in the grip of (Marcelo) - (Marcelo) is controlling the highways - there is no place for gun and drug sellers in bars thanks to the efforts of Mr. (Marcelo) - we are safe now thanks (Marcelo's) men, indeed, (Marcelo) succeeded in maintaining his chair and (Gonti) also, after

which the youths did not make any further demonstrations, but were completely occupied with the issue of the emergency security file, and the last recorded videos was the success of the security men in nullifying the booby trap of a wooden express train, as some users commented on (YouTube) because in the company's studios, they installed a wooden train and filmed a video showing some terrorists trying to blow it up and (Marcelo's) men succeeded in chasing them and arresting them, so that the (Keno) programmer and his team adjust their video. However, some of the users of the YouTube platform, with experience in the field of montage, have discovered that the train is completely unreal and does not exist on the railroad lines of the province or other neighboring districts, so they start writing that the video is not real. Others assumed that the video was poor in quality until it appeared that way, but the Black Scarf Company did not comment on this video and left the audience confused about it, some of them say that the video is incorrect and others confirm the validity of the video and praise the efforts of Mr. (Marcelo) that he and his friend (Gonti) succeeded in directing the public to many sub-topics guaranteeing their presence in the current government and not asking them about any new reforms or amendments concerning young people and others who are disaffected with the current conditions.

7 Funny funerals

The clock was pointing at ten in the morning when one of the undercover agents of the FBI, who is directly under the National Intelligence Service, asked the Secretary of the Office of the Chairman of the Board of Directors of (A-One) Company (Sebastian) Android interview or (Zapatero) Marcello, personally, so the secretary asked him: Has a previous date been set for this interview? He replied, "He is a government investigation officer, and he came to see the company president on a vital matter." So she asked him to enter to tell (Sebastian) inside about the matter, then (Sebastian) allowed her to let him enter, so Mr. / (Antonio) the secret agent of the FBI entered and said (to Sebastian): My name is (Antonio Valdes) from the National Bureau of Investigation to the Intelligence Agency and I came to you in An issue related to the state's information security, so (Sebastian) replied to him: Please go ahead and explain to me what the truth of the matter is in detail, so Mr. (Antonio Valdes) said to him: Actually, Mr. (Sebastian): There have been many complaints filed against the company (Black Scarf) and we doubt the activity of this company as well as the content provided through them that it is not without fraud. Our office has decided to use your company because it has extensive experience in the field of programming and

computers to help us uncover the false activity of this company, but in complete secrecy without seeing this task on a large number of company members, but using reliable people in the narrowest limits. Only members of your private mission who you will use to track the spurious activity of this company across the network are aware of this interview.

(Sebastian) replied to him: I do not work on my own. I have two other business partners that I must consult about this task.

Mr. (Antonio Valdes) replied: I know that you do not work alone without Mr. / (Michelle) and Mr. / (Zapatero), take your time and show them the matter, and respond to me at the earliest opportunity, so (Sebastian) said to him: Well, we agreed, I will show them the matter, and I will answer you soon. Indeed, (Sebastian) presented the matter to (Michelle) and (Zapatero) and (Michelle) replied to him: (Black scarf), they are cheating almost everything, this matter is not for us,

but (Zapatero) replied to him: It is definitely a unique challenge liken the challenge to online hackers and they agree to find out the matter first before responding to accepting or rejecting this task. Indeed, the trio tracked the women in black

who were used by (Harrison), (Janet) and (Lucy) for screaming and wailing at the funerals, and the trio (Sebastian), (Zapatero) and (Michelle) sat near them and (Zapatero) said: the deceased was a scientist in the field of geology sciences,

so one of the women replied: Yes, he measured the salinity level on my farm before and (Sebastian) shouted at the wife of the deceased: Isn't it ?! His wife replied: No, but he was a specialist in agricultural pest control. (Michelle) says: We did not go far and asked the same first lady: he was a heavy

drinker in daily coffee and had an allergy to oranges, so the lady replied: he had a Urticaria attack when she presented him with a fruit cocktail containing orange juice, so his wife respond: he was not drinking coffee at all and had an allergy to strawberries. (Zapatero) told one of the women in black: was he not exercising every day in your gym every morning, the lady answered him: I used to see him every day, and I would miss him a lot, also friends at the hall too. (Sebastian) shouted to his wife: Was his health permitting all this? His wife replied: He was unable to exercise because he was a heavy smoker and had a narrowing of the coronary artery. (Zapatero) then asks his two friends: Who are these women? (Michelle) screams after that: "Do you know them, (Sebas.)?" (Sebastian) then asks the wife of the deceased: Do you define them, madam? Her response is that it is the first time to see them. (Sebastian) screams in their faces: Take out your identification cards, you fraudsters. we are bored of acting, and these women are greatly troubled and try to leave, but (Sebastian) prevents them and insists on their identity cards being issued in front of the deceased's wife, so they take out their card while they are ashamed because their names are different and not related to the deceased from near or far, then (Zapatero said): What brought you here? Here the old aunt of the deceased shouted and said: Stop this, I have rented them through (The Black Scarf company) because young women do not find mourn like this of my nephew's wife and I wanted the attendees to cry over my nephew a lot. (Sebastian) says: But, madam, these are fraudsters from the company whose foundation is fraudulent work and here the old aunt clashes

with her nephew's wife and juxtaposes the verbs. When the trio was about to leave, a member of the deceased's family asked them: Who are you, the strange trio? (Michelle) respond: We are the new classmates of the deceased in the agricultural pest control department, and we have come to reveal the fraud of these women, and then (Michelle) said to (Sebastian): Thankfully, the attendees did not know our original photos and could not identify us. Tell Mr. (Antonio Valdes): We have definitely accepted his mission and are fully prepared to continue joking with the National Intelligence Service.

8 For the lovers

The three friends were able to obtain some videos and fabricated photos through some of those close and who have contact with some victims of the (Black Scarf) company and through some programs to merge, separate and amend the videos that they use on the Android 11 version (Royal Jelly) that they owned they were able to separate the fake video from the real video, as well as separate the modified photos from the original photos, and they kept their work output on their own servers. The three friends wanted to help some loved ones whose relations were corrupted due to the suspicious business of the company (Black Scarf), but in complete secrecy, they did not want to reveal themselves to the public at this time, the match is still in its beginning with the company (Black Scarf) and their appearance to the public now may spoil their confidentiality mission in revealing all the games and schemes of the company (The Black Scarf), they decided to help the loved ones from a distance, so they created an imaginary account via Facebook in the name of the friendly (Valentine) and they were close to Valentine's Day and sent to each victim a message containing the contents of what they separated from pictures and videos to reveal the deception of this victim and her mistrust on the other side due to the practices of the company (The Black Scarf). The result

of these messages was that the waters returned to their sewers in the relationships of some loved ones and did not return with others because each of the two parties had been associated with a new partner and the friends felt the bone of their work after some loved ones returned to each other and grieved a little for some of the relationships that were not so before and felt they have done what can be done on this matter of fabricated videos, they turned to a more difficult and complicated topic than this topic of love victims, which is a problem of quasi-actors and officials. The Trio assigned: (Sebastian), (Zapatero) and (Michelle) a special team to monitor all movements of Mr. (Harrison) from the (Black Scarf) company and monitor all the persons he meets or deals with, as well as secret interviews that he performs outside the company. The first one to be observed was a similar artist (Martin Nicholas) and he lived in a province not far from (Mendivia) and was exploiting the similarities between him and the famous actor in the work of many women's relationships and he used some of the girls' victims to get money from them in exchange for some false promises That did not materialize of course, the team in charge of (A One) was able to photograph the artist-like and interviewed some of his victims who confirmed that he was lying and deceitful and did the opposite of what he said, and they recorded their testimony in voice and image. As for the young singer-like (Edward Hull), he lived in a very poor and extremist province on the borders of the state of (Ironca), and he used the similarity of his voice between him and the young singer to perform popular concerts, as well as revive popular festivals

for the people of his poor district for a sum of money, because, of course, they were unable to pay the high fee of the original artist, and the team assigned by the (A1) company photographed him reviving one of the popular weddings, as well as the poor housing that he lives in and the pay that he received after reviving this popular wedding. As for the mayor-like, he also lived in one of the poor provinces, and used the similarities between him and the mayor of (Mendivia) to imitate him in front of the public and ridicule him and cast jokes on him in front of a large audience, the (A One) team was able to photograph one of his monologues shouting like the mayor of (Mendivia) when he made an important statement or denounced one of the violations. As for the artist (Margaret)-like, she used to offer one of the belly dance shows in one of the nightclubs, and she was swaying and showcasing among the men who are rushing her because of the similarities between her and the charming actress. The (A-One) team filmed one of its dances, and the research team returned with this huge amount of absent facts to the headquarters of (A-One) company to find the trio: (Sebastian), (Zapatero) and (Michelle) waiting for him who did not hesitate to create A fake page on (YouTube) also, is called: (Your Scarf off) to review this amount of videos of the recordings made by the research team in reference to the detection of fraud and counterfeiting of the company (the black scarf) and they still want people not to know that the company (A One) is behind all this.

9 Advertising girls kidnapped

The research team assigned by the company (A-One) was able to reach some advertising girls who promote some harmful products and unlicensed drugs. The research team kidnapped a number of them and brought them to a secret place where the trio: (Sebastian), (Zapatero) and (Michelle) were waiting for them. The research team was dressed as security men while the trio played the role of investigators, and the surprise prevented these girls from thinking about what was happening around them as they found themselves in front of the fake investigation trio: (Sebastian), (Zapatero) and (Michelle). (Sebastian) then tells them: You're now at the FBI on charges of promoting harmful products and unlicensed drugs and misleading many consumer audiences. The first question: How long have you been working for the company (The Black Scarf) and the first girl answers while she is somewhat turbulent, we do not know what you are talking about, (Michelle) then said: Denial will not help you in anything and showed her the first announcement about a medical product that treats roughness of the knee as it appears in her advertisement, He said: do you know that this product does not contain any compounds that treat or help relieve joint pain? Then she replies: I don't know anything. Mr. (Harrison) understood me that this product treats knee roughness, so

(Sebastian) interrupted her: Mr. (Harrison), this is exactly what we want to reach and how much did you pay for this ad?

She says: 20 thousand dollars, then (Zapatero) displays the other advertisement in which another girl appears and says to her: Do you know that the cream that you claimed works on enlarging the breasts and buttocks has caused abnormalities in many women? (Marianne) says: My breasts are completely attached and my ass has big red burns in exchange with big white spots as well, my husband can't look at me now and I'm unable to do an intimate relationship properly. Then

(Sebastian) addressed his words to the third girl: Do you know that the product of the male sexual enhancer you are announcing has made Karl's penis fixed to the erection until he is taken to the hospital and the doctors have entered to draw an amount of blood from the veins of the penis? So the third girl replied: This indicates the authenticity of the product, Mr. Detective, (Sebastian) tells her: You are promoting counterfeit drugs with counterfeit ingredients, and if they have some effectiveness, the charge is the same as it is because it does not have a license from the Ministry of Health.

How much did you both get these two ads and the third girl replied: We each got \$ 15,000. For the fourth one, she speaks on its own accord: the impurities hair product that I am promoting is adulterated and contains harmful ingredients and the hair does not return to its original color as well as the baldness preparation product. I was charged 10,000 dollars for this ad and (Sebastian) says to her: And I add to you that it contains carcinogenic components as well, but do you recognize yourself so easily? She replied to him: There is no

longer what we deny, sir, so (Michelle) ask them to sign their confessions after they have recorded their confessions, sound and image, so (Sebastian) will understand them, then, that their confessions may reduce the sentences imposed on them and help them to get arrest of Mr. (Harrison) after he understands them that only fine provisions await them, provided that Mr. (Harrison) and Co-partners are arrested. The three friends kept records of these confessions sound and image and returned some time to their original work as owners of a software company and professional application developers as they made free applications on the Android system explaining the danger of using the fake product and its harmful components on human health. They review these harmful components and their negative impact on different body systems and suggest natural or chemical alternatives to the consumer audience in the form of a professional user catalog as well as indicative applications of healthy drugs, their active ingredient, and other unlicensed counterfeit substances and their harmful substances to health. A large audience of consumers interacted with (A-One's) indicative applications, and the company won many likes from users. The records of naked advertising girls' confessions and their signatures remained with them until they meet Mr. (Antonio Valdes) and handing them to him, the topic now relates to the health of a large audience of consumers which it exceeds the terms of reference of the (A-One) company software or network.

10 Fake studios

The research team arrived at the whereabouts of the fake studios of the company (The Black Scarf) and watched the company's directors as they handed out the roles to the actors.

The division was more like a cowboy game, as a team of actors will play the role of the military and others will play the role of thieves. What made the research team at the summit of laughter was the surprise that the thieves' group of actors faced when the security personnel suddenly appeared, and the director taught them all that was supposed to be done, and soon after, he appeared to them how to set up the maquette for a church, for example, or a vital facility. Then the jihadist appears in cadre, as he makes brave steps to blow up the building, then a security hero appears to prevent him from storming the building, and he cites in the film in advance the role of the brave martyr who defends the sanctities of his homeland. What made the research team not control itself from the intensity of laughter were the suicide bomber, as well as the officer that rise from the ground and dusting their clothes after the scene was finished and their imaginary martyrdom through him. Among the funny scenes, too, was the extreme sensitivity with which the explosives expert deals with the time bomb in order to neutralize its effect and the instructions given by the director accurately for the cinematic

plot. The research team filmed what could be photographed, but they decided to take the trio: (Sebastian), (Zapatero) and (Michelle) with them next time until they see these representations of the truth and get their share of the laughter that the research team experienced when discovering that truth. It seems that the world of the company (The Black Scarf) is a fictitious world that is not real. All that is managed in it are representations that the director teaches well to a group of unprofessional actors who appear from their poor performance unconvincing is that without the hard work of the director with them and the kidnapped programmer (keno) montage, they could not convince a ten-year-old child, but this lackluster performance may deceive the simple and other naïve people who believe anything without careful consideration. The research team escorted the three friends the next time and watched the models of wooden trains and cardboard bridges and the imaginative performance of the terrorists, (Michelle) said afterwards: It looks like we are in the theme park and (Zapatero) said: I will present (Harrison) head to the child (Buggy) not to the intelligence public service, (Sebastian) then replied: to the king of the jungle at the zoo or to feed the shark in the fishbowl and (Zapatero) said afterwards to his friends: With these recordings we have already finished with them, it remains only to hand over what we have to Mr. (Antonio Valdes). Indeed, (Sebastian) calls Mr. (Antonio Valdes) and tells him: We have everything that belongs to the company (Black Scarf) and indeed, Mr. (Valdes) receives all the records and an order was issued to control the founders of the company (Black Scarf) and to stop

all its activities and wax them with red wax. Indeed, Mr. (Harrison) and (Lucy), (Janet), (Jacqueline) and (Keno) the kidnapped programmer are caught and investigations are underway to remove the immunity of Mr. (Marcelo), the Minister of the Interior and Mr. (Gonti), the Minister of Manpower, for their involvement in fraud with the (Black Scarf) company as the public misleads and directs public opinion to interact with totally unreal events and generates panic among viewers, the investigations continue to reach everything related to this company, such as journalist (Pinto Gonzalez), who may be sentenced by court to mislead the public and publish false information about fake and non-existent events actually which might amount to preventing him from posting again. Mr. (Antonio Valdes) thanked the three friends for their efforts and wished them success in their field of work in computers. The three friends asked him to post what they had on YouTube, so he asked them to wait for the investigations to be completed, because he followed the channel (Your Scarf Off) and told them that the matter is different now, because the investigations have become official and have involved some of the senior officials in the state.

11 Presentations offered to (A1) company

After the end of the investigations of the company (Black Scarf), Mr. (Antonio Valdes) authorized the three friends to release the recordings they had, and they set up a new channel on YouTube called (The theme park). They reviewed the story in detail from its inception and the recordings that the research team recorded about the quasi-actors and officials and the audience knew that they are the owners of the (Your Scarf Off) channel, and they reviewed on the new channel the fake studios of the company (The Black Scarf) and The unconvincing performance of the actors and how each of them memorized their role well so that the hoax was not exposed and it was a normal thing for professionals, something except a fake company that used some of the computer programs professionally to trick people, but it appeared to the simple people, like loosening talismans or revealing some of the magician's shows. People marveled at the great resemblance between the actor, his likes, the official and his likes, and some echoed the proverb saying: “Created from the likeness more than forty”, as well as suicide bombings that take place through wooden platforms or pieces of decorations used in cinematic tricks as well as the false championships that (Marcelo) and his men achieved by blowing up several boards of wood or arresting some thieves who wore white and black

striped T-shirts as shown in cinematographic films. These false people were ridiculed by commentators on the videos as much as the scenes they filmed, where one of them said to Minister (Marcelo): Championships are not bought, Mr. Marcelo, and you do not know how to do it even like women. Another said to the officer who fell in the attack against the explosive belt of the terrorist: O man, pick up what has fallen from you and another said when the bandits were arrested on the road: its guardian is its thief, so where is the security? Others said to Mr. (Gonti): Now you have guaranteed me a job among the dancers of the (Ironca) cabarets, and you are only know honking behind a whore, if the head of the house with the drum is a hitter, then the people of the house are all dancing and other stinging words that got from the two ministers and actors who perform the heroic deeds of the security men through the studios of the company (The Black Scarf). Others have verbally abused the government's men and even the country's president himself. (Sebastian) intervenes on behalf of channel's Admins and said: Corruption is everywhere and the intelligence service has a big role in exposing the fraud of this company. It is of course a new kind of fraud to make everything that is realistic more like a representation for people to play their role on it as actors do on the stage but we cooperated with them to return again to the ground and solve our problems rationally without treating things with a paragraph of play that we laugh at ourselves before we cheat Others, we promise you, through (A One) Company, to assist you as much as possible and find possible software solutions for that. After honoring the three friends

from several sides, including the mayor of (Mendivia) province himself, (Sebastian) received offers from many car companies to purchase the models of his patented for Electric Dynamo Car among those companies were: the Italian company (Maserati) and the German company (Benz), as well as the English company (Aston Martin), and a one-company company was offered offers to buy software solutions provided by the company for use in the Internet, as well as training a number of investigative officers Internet to use with the guarantee of providing support from the company's experts when needed and after all these offers, which included financial support for their company for several years to come, the three friends felt responsible towards the ordinary user who does not have programs or solutions such as large companies or even the government and the need to direct him towards the correct news especially from the simple ones so as not to be deceived or fall victim again to the likes of the company (Black Scarf) so they made a free application on the Android system as well as the two systems: (Windows) and (iOS) and called it (Detective News) This application uses search algorithms to detect Similar news from several sources. Once you put the news title in the application, for example: The president of the country opens a new power station, the application searches on its own on the sites or newspapers that have published the same news to inform you, for example, that this news has appeared in 20 website, as well as 3 newspapers, and they are so Or write, for example: the innocence of the founders of the company (The Black Scarf) of the charges against them to inform you that this news has

appeared in a number of unreliable facts and warns you of them, and every time you search it puts a checkmark next to the site or the trusted newspaper and the skull icon next to the site or newspaper that broadcasts fake news to warn you of them and they have developed this application in the latest versions of it where you can upload the video on the application to search (A One) company for you the correctness of this video if it has undergone a merger or amendment process through the montage programs and then sends you the result if this video is original or someone changed it through the montage programs, this application impressed a large number of users and thanked the staff of the (A One) company team for this wonderful application that It helps them find the right news.

12 The funny trick of (Michelle)

(Sebastian) Android and (Zapatero) Marshmallow are waking up to find hundreds of messages and many e-mails that they contain: Look at what your third friend (Michelle) is doing on YouTube. The two friends will be surprised by a new channel on YouTube called: (The Red Scarf) Company Through which someone very similar to their friend (Michelle) broadcasts that he left the company (A-One) and established a new company called (The Red Scarf) because his friends and his original company (A-One) were involved in cheating with the company (Black Scarf), but when the matter came to the President of The country, the intelligence service decided to sacrifice one of the two companies and presenting it to people as it is which plays the role of the villain and preserving their company as it is which plays the role of good in the country and that (Sebastian) and (Zapatero) have agreed to that, but when he disagreed with them he decided to reveal the truth in front of all people so that they do not continue to provide the role of good in front of people more than this because they are doing this to preserve their company and the country's president reputation. This video has spread like a speed of wildfire on social media and (A-One) has lost much of its popularity and reputation in front of people. Some have called for the need to boycott all of the company's applications and

software products. One of them wrote in the comments: Politics is a dirty game that includes everyone involved, another wrote: Even (Android) and (Marshmallow), who are seen by children as national heroes and the elected president, who do we trust next? Another wrote: (Michelle) tattles his friends when they betrayed him; there is no safety even in friendship. (Sebastian) and (Zapatero) are upset with all this. They waited until (Michelle) came to explain to them the truth of the matter, and when (Michelle) arrived at the headquarters of (A-One) his friends asked him to explain to them what was going on and (Michelle) answered them that he was surprised just like them and does not know what is the truth of these videos. They tried to act quickly because the reputation of their company was at stake and the matter reached the president of the country, which threatens the collapse of their company forever, they used their software to determine the location from which these videos were broadcasted and the place was constantly changing, and they asked for help from Mr. (Antonio Valdes). They told him that a similar to (Michelle) may belong to the company (The Black Scarf) who wants to take revenge on them and destroy the company (A-One) that has always worked for the good and to provide assistance to the people and they were able with the help of Mr. (Antonio Valdes) and the state satellite to locate and arrest the similar of (Michelle). The surprise was that (Michelle) found this similar to him by chance and decided to make a trick in his friends to see how confident they are in him as well as how skilled their advanced software solutions are, but Mr. (Antonio Valdes) told him that he bothered a

large number of people with these videos as well as many authorities of (Ironca) because if it had been more than this for the next few days, he would have written an end to (A One's) reputation, but he told him that all of this would be fixed within limited hours and the three friends appeared on (YouTube) website and the similar of (Michelle) with them through a live broadcast on the company (The red scarf) channel. (Zapatero) told people that it was (Michelle's) experiment to prove that cheating cannot be completely eliminated, as well as from pirated material, but developers should try as much as possible and (Michelle) told people and his similar was beside him: Whatever the quality and professionalism of the anti-virus programs that you use Also, firewalls programs give you 99% protection at best, because it must remain within this 1% rate undiscovered loopholes or loopholes through which pirates might be able to access, for the Internet world is like the vast sea in which you do not secure all of its risks while you are sailing through it. As for (Sebastian), he said: Why did (Michelle) use the company name (Red Scarf) specifically? Because if you surrender an evil person to the hands of justice, be prepared because he may come one day to take revenge. Trust the three friends and the (A-One) company because we have always worked in the computer field for love and our success has been to provide a good product to the public that helps them to complete their tasks so that we can be proud and celebrate it in front of all people that we are the owners of this because we always loved our work as developers, not as hackers.

The End

A short revised story
